**TUBING CONNECTION**

**INSERTING**

Push in the tubing

**REMOVING**

1. Push in the connector collar
2. Pull the tube straight back while holding the collar in

**To INSERT TUBING:** push the tubing into the connector until resistance is felt, then push a little further, about 1/8 inch [3 mm]. Gently tug on the tubing to make sure it is captured.

**To REMOVE TUBING:** push the tubing in slightly, then push in the connector collar while pulling gently on the tubing.

When removing tubing, **DO NOT pull on the tubing without pushing in the collar,** as this will likely damage the connector.

**Note:** Alternate outlet fitting provided. Replace installed fitting as preferred. Maintain cleanliness for oxygen service. Torque to 20 in-lbs. No Teflon tape required.
